

# Get Help to the Right Place — Fast

A wireless call button system that alerts staff through connected radios.

## Call Button System **SK-22-418**

**Call Button Transmitter**  
SK-22-418T

**Call Button Receiver**  
SK-22-418R

## Instant Help Alerts

Give shoppers, patients, or team members a simple way to request assistance. Press the red button and the receiver triggers the selected audio message through a connected radio system, helping staff respond quickly where support is needed.

## Why it works

### Fast, Visible Request

Red button activation sends a clear alert and confirms activity.

### Repeating Message

The message repeats every 30 seconds, six times total, so alerts aren't easily missed.

### Flexible Audio Setup

DIP switch panel lets teams select the desired audio file for any situation.

## Simple 3-Step Operation

- 1 Press**  
User presses the red call button.
- 2 Alert**  
Receiver LED blinks as the message plays.
- 3 Reset**  
Press again to deactivate or let it time out after 3 minutes.

## Ideal For

- ✓ Retail and customer service areas.
- ✓ Healthcare and reception environments.
- ✓ Schools, offices, and public facilities.
- ✓ Stock rooms, back rooms, and staff support areas.
