

Troubleshooting the "LE" Alarm System

Key Systems (SK-103LE) or Keypad Systems (SK-103KLE)

1. Alarm Problems

Alarm on, no apparent reason:

- Verify that the sensor is properly secured to the product
 - Make sure sensor is properly installed
 - Sensors are properly plugged into ports
(All ports must have either a sensor or a shunt plugged in them)
- All sensor lights must be red, if not, recheck attachment to product.

No Alarm

- Make sure batteries are installed and the AC/DC power supply is plugged in.

2. Beeping

Single beep, ever 30 seconds

- Unit is disarmed, arm either by turning key on or by keying in the proper code.

Double beep

- Indicates low batteries, replace batteries

3. Keypad System

Cannot activate or de-activate the alarm system

- Make sure you are using the correct code
(Press the star key [*] to clear the wrong code and key in the correct code).

Troubleshooting the "LE" Alarm System

Key Systems (SK-103LE) or Keypad Systems (SK-103KLE)

4. Light Problems

Green light on sensor does not go off

- Recheck attachment to the product

Green light on LE strip of splitter box is "on"

- Verify that the sensor or shunt are properly plugged in.
(If it is a shunt, verify that the wire is not broken).

No lights

- Make sure batteries are installed and the AC/DC power supply is plugged in.

No lights on sensors

- Verify that the strip is plugged into the alarm unit.

No lights on a specific sensor

- Plug another sensor into at the same location
 - **If it lights up**– Replace the original sensor.
 - **If no lights appear on the sensor once again and other sensors on the same strip are lit**– Make sure the socket is clean without any foreign objects and that the connection pins extend in the same manner as in other sockets.

Yellow light is not flashing

- Light should flash every 10-15 seconds, if it does not, replace the (2) two 9 volt batteries.

If the problem is different from any mentioned above,
or if you cannot resolve the problem,
